Dr. Richard White
Chief Editor of Scientific Reports
Springer Nature Limited
The Campus, 4 Crinan Street
London, N1 9XW
UK

Dear Editor Richard White,

I have the pleasure of sending you the manuscript entitled "Nonlinear methods to quantify Movement Variability in Human-Humanoid Interaction Activities" authored by Miguel Xochicale and Chris Baber from the University of Birmingham to be considered for publication as a research article in your prestigious journal.

Our work is appropriate for Scientific Reports due to its alignment to the principles of open science (e.g., reproducibility, transparency, reusability and open accessibility) in the fields of physical, biological, health and engineering sciences. Similarly, we choose Scientific Reports as venue where potential interest of readers in above mentioned areas along with raising interested and spark collaborations.

Our manuscript contains original research and has not been submitted or published earlier in any journal and is not being considered for publication elsewhere. Authors have seen and approved the manuscript and have contributed significantly to it.

Finally, we think that two suitable reviewers for our work would be: Bedartha Goswami, bedartha.goswami@uni-tuebingen.de, at University of Tübingen, for his investigation in nonlinear time series analysis and recurrence plots; and Serhiy Yanchuk, yanchuk@math.tu-berlin.de, at Technical University of Berlin, for his research in dynamics time delay networks of dynamical systems, pattern formation, and coupled systems.

Sincerely yours,

Miguel Xochicale
